

## Technical Bulletin: Pro Series AMB 2000 Double-Sided Tape

**Product:** Pro Series AMB Double-Sided tape Approved for use with Pro Series Komfort+ Underlayments

**Date/Revision:** 08/11/2023

---

Pro Series AMB 2000 Double-Sided Tape is now approved for use with Pro Series Komfort+ 17, Pro Series Komfort+ 30, and Pro Series Komfort+ 50 underlayments.

- Pro Series AMB Double-Sided Tape SKU 3114108 can be used on all Komfort series underlayments.
- Pro Series AMB Double-Sided Tape can be used to connect pieces of Komfort cushions that for whatever reason do not have the overlapping moisture seal strip in place and full substrate moisture protection is required. Two rolls butting together end-to-end would be an example of an area where the tape would be required.
- For this purpose, the projective surface layer of the double-sided tape will be left in place before installing the floating floor.
- Use of Pro Series AMB Double-Sided tape will provide the same level of protection from substrate moisture as the overlap strip and retain full moisture protection warranties.
