

PRO SERIES

KORK

NATURAL CORK UNDERLAY

The bark of the cork tree makes an excellent natural acoustic underlay, with many physical properties that are desirable in a hardwood underlay including sound absorption, insulation, and impact resistance. It is also rot and mold resistant and is a naturally renewable resource as well. Pro Series Kork is manufactured in easy to handle 2' x 3' (610mm x 915mm) sheets. It is made from authentic natural cork with a polyurethane binder, and comes in two thickness options. It can be used in glue down and floating installations. It may also be used in nail down installations but the use of mechanical fasteners will diminish the acoustic performance of the underlay.

FEATURES

- Superior soundproofing performance (AIRC 58/Delta 22)*
- Natural insulation & impact resistance
- Precision made 2' x 3' sheets, easy to install
- Mold and mildew resistant
- Available in 4mm or 6mm thickness

USES

- For use with solid or engineered hardwood or laminate flooring
- Can be used in nail down, glue down (double stick) or floating installations.
- Note: use of fasteners (nails/cleats/staples) may diminish acoustic performance.

PRODUCT SPECIFICATIONS:

Sheet Size: 24" x 36"
610 mm x 915 mm

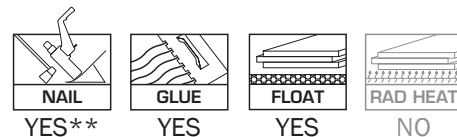

AIRC Rating*: 58
Delta*: 22

*Testing scenario: 7/16" engineered hardwood over Kork on 7 1/2" concrete subfloor with no ceiling. Results will vary depending upon the building structure and various floor/ceiling assemblies. Contact Metro's Technical Service Department for assistance in developing a flooring assembly solution for your project.

INSTALLATION OPTIONS:

Above grade: OK
On grade: OK
Below grade: OK

** The use of mechanical fasteners will diminish the acoustic performance of the underlay.

KORK 4MM:

SKU # 3122024
Box Contents: 38 pieces
Coverage: 228 sq/ft
21.20 sq/m

KORK 6MM:

SKU # 3122025
Box Contents: 25 pieces
Coverage: 150 sq/ft
13.95 sq/m
