3. DESCRIPTION

MSC Easy Clean Powder makes floor care simple. Just mix with 16 oz of warm water and clean worry-free. This pH-neutral, unscented formula is 100% safe for kids and pets, keeping your Kentwood and Evoke floors looking their best, day after day.

Key Features and Benefits

- Powder formula makes mixing simple
- Neutral pH means worry-free cleaning for a variety of surfaces
- No need to ship water. Eco friendly
- Long shelf life
- 100% compatibility with our MSC Easy Clean Mop Kit

Application:

MSC Easy Clean Powder is designed for use in our Easy Mop Kit and suitable for the following pre-finished flooring including;

- Laminate
- Vinyl (WPC, SPC and Rigid Core)
- Hardwood
- Ceramic Tile
- Glazed Porcelain Tile

Preparation & Coverage

Sweep or vacuum the floor regularly to keep it free of dust, grit and other abrasive materials. Blot up any food, drink or liquid spills immediately. Do not use a vacuum beater brush or steam mop for cleaning. Do not flood the floor or use a wet mop when cleaning; use a damp mop only. Do not use any detergents, oils, soaps, citrus-based or 'mop & shine' products, pastes, waxes or solvent-based polishes.

Fill the Easy Clean Mop reservoir to the fill line, with 16 oz of warm water. If you live in an area with hard water, please use filtered or distilled water. Add one package of Easy Clean Powder and shake. Let the powder dissolve for a few minutes. Natural settling of solution should be expected. You may wish to periodically shake the reservoir to re-mix the solution. Attach a slightly moistened, but well wrung out, clean microfiber mop head (provided) to the Easy Clean mop. Replace reservoir and begin cleaning. Whenever applying solution to the floor using the spray trigger, ensure the mop is in front of you, and at a slight angle to the floor, to avoid spraying solution directly into bevel joints.

Avoid overspray near walls and baseboards. Do not flood the floors. Use only enough solution to clean the floors, not to soak them. You should see the floors drying behind you. Do not leave the floors wet. If you have applied too much solution and the floors are not drying, it may be necessary to go over the cleaned area with a dry microfiber cloth to blot up excess moisture. A fully mixed 16 oz bottle of cleaning solution should cover approximately 1000 sqft.*

*Coverage may vary depending on how dirty the floors are, the type of surface you are cleaning and how much solution you are spraying on the floor.

4. TECHNICAL DATA

Physical Properties

Complete™ Easy Clean Powder	
Description	
Physical State	Solid
Appearance	Powder
Color	White
pH	8
Acute Toxicity	Harmful if swallowed
Odor	Slight
Shelf Life	2 years
